

**Please add the following new claims:**

---

13. (New) A containerized refrigerant product comprising,  
a pressurized cylinder, and

a liquefied refrigerant composition disposed in said cylinder, said composition comprising in combination a non-CFC refrigerant and a UV fluorescent dye pre-dissolved in a solvent for said dye, wherein said solvent is other than the refrigerant or a refrigeration system lubricant, whereby said refrigerant, dye and solvent comprise a uniformly homogenous composition in the liquid phase within said cylinder.

14. The containerized refrigerant product as set forth in claim 13, wherein:

B3 said refrigerant is selected from the group comprising HCFC-22, HCFC-123, HCFC-124, HCFC-142b, HFC-32, HFC-134, HFC-134a, HFC-152, HFC-152a, HFC-143a, HFC-125, HFC-245ca, HFC 225ca, butane and propane;

said solvent comprises a mixture of fatty acid ethoxylate and alcohol ethoxylate, and

said composition further comprises a lubricant selected from hydrocarbons including natural or refined mineral oils, synthetic hydrocarbons, alkylbenzenes, polyalphaolefins, synthetic polyalkylene glycols and polyolester lubricants.

15. The containerized refrigerant product as set forth in claim 13, wherein:  
the dye is a naphthalimide fluorescent dye.
